

# CLOUD CHANNEL

## collaborative media communication service for local government information processing

Cloud Channel is a media collaboration and communication service that provides a private forum for a local government to improve the teamwork and collaboration between different departments, contractors, and residents. The elevated level of collaboration and communication from Cloud Channel will facilitate the processing and reviewing of city permits. Residents/Contractors can upload the required images/videos to accompany their applications when applying for building permits as well as create a private interaction between a government department and a resident/contractor regarding the applications for permits. Cloud Channel also meets the media-centric collaboration and communication demands of the different government departments with its ability to share media among the various departments and their respective audiences.

### Features

- Complete media workflow and management solution
- Affordable SAAS-based subscription (monthly or annually)
- A resident/contractor uploads images/videos to supplement his application for a permit
- Local government departments review the images/videos uploaded by a resident/contractor to determine whether to grant a permit
- Local government departments can upload sample images/videos in Cloud Channel for residents/contractors to use as guides for taking pictures of the properties when applying for certain permits
- Share videos/images between different government departments and their respective audiences

**Apace**

## Government Department

Watch and review the supplemental images/videos uploaded by a resident/contractor that accompanies his applications for a city permit to determine whether he meets the city standards and help decide whether the permit will be granted. The department handling the processing of the permit can share the media with other departments if a resident/contractor applies for multiple permits that requires the approval of different departments. A department can also upload instructional guides for residents/contractors to follow on how to take proper pictures or videos when applying for certain city permits that require visual inspections as well as interact with residents/contractors in the comment section of Cloud Channel.

## Resident/Contractor

Uploads videos/images in Cloud Channel to supplement their applications to the city for building permits or any other permits. A resident/contractor can communicate with the specific department that is handling the processing of his permit in the comments; creating a temporary, private interaction with the government department.
